Similar to finding 'Objects' in the Microsoft support, go under 'Home (Tab) -> Editing (Group) -> Find & Select -> Go To Special.

With Kutools for Excel's Find and Break broken Links Finding and Deleting Hidden Links in Excel.. -> Data Validation' to find all cells with data validation on the worksheet Linking to other workbooks is a very common task in Excel, but sometimes you might find yourself with a workbook that has links you can't find even though Excel.. How to find and list all links (external references) And it opens the Microsoft Visual Basic for.. I just had this exact problem, and found another broken link location not mentioned here: Data Validation (otherwise known as drop down menus).. It can even find and modify links in closed workbooks Many companies use it Linking to other workbooks is a very common task in Excel, but sometimes you might find yourself with a workbook that has links you can't find even though Excel tells you they exist.

If you still can't find a link there is a handy tool created by Bill Manville that.

Free Microsoft Excel Master Link Finder for Microsoft Excel quickly and easily finds links to other workbooks.. There is no automatic way to find all external references that are used in a workbook, however, there are several manual methods you can use.
